Number of Curables 22
,, Incurables 32
,, Criminals 32
All cases, under twelve months standing, admitted.. 32
Attention directed to the bad and hopeless state in which Patients are taken to the Hospital 33
Inquests held during the year 33
Suicide of very rare occurrence, though impossible always to conquer a suicidal determination 33
The walls of one of the Female galleries papered, and great additional appearance of comfort 33
New Boiler erected, owing to inconvenience experiened from want of steam power 34
Additional Greenhouse erected to supply plants for gratification of Inmates 34
Tailors' and Shoemakers' shops finished 34
Difficulty in finding employment for Male Patients 34
Appointment of Garden Attendant works well 34
Arguments for removing this Hospital into the country do not apply, as a large staff of paid Servants would be required, that are not now necessary 34
The system of having always two resident Medical Students in the Hospital, elected every six months, works well.. .. 35
No non-resident Medical Pupils taken during the last year .. 36
Great regret at the loss by death of the two late Presidents.. 36
Excursions of good effect to the Patients.. 36
Musical Entertainment to the Patients 36
Official Report of the state of the Hospital by Commissioners in Lunacy.. 37

KING EDWARD'S SCHOOLS.

CHAPLAIN'S REPORT, 1868.

To the Right Honourable and Right Worshipful the PRESIDENT, the Worshipful the TREASURER, and the GOVERNORS of King Edward's Schools.

MY LORDS AND GENTLEMEN,

I cannot commence writing my Report for the past year, without in the first instance alluding to the great loss the Royal Hospitals of Bridewell and Bethlem have sustained by the deaths of our two late Presidents, Mr. ALDERMAN COPELAND, and Mr. J. E. JOHNSON. Of both these gentlemen it becomes me to speak with the utmost gratitude; not only for the confidence with which they honoured me, and the steady support I always received from them in the discharge of the duties connected with my office, but for many acts, also, of personal kindness;—acts which have left an indelible impression on my mind, and, which I should not be doing justice to my own feelings, if I did not, now that they have passed away, thankfully acknowledge. Their removal has cast a gloom over the Institutions with which they had been so long and so beneficially connected, which will not soon be dispelled.

But I turn to the immediate object of this Report, which is to lay before you "the state and condition of King Edward's Schools, and such occurrences therein," during the year 1868, as I consider worthy of notice.

In the course of that year, there were—

Admitted.		Discharged.	
Boys	40	Boys	35
Girls	48	Girls	42
	88		77

There were remaining in the Schools, on the 31st of December last, 100 boys, and 98 girls, making a total of 198 inmates. Two boys were admitted from the City of London.

The inmates discharged during the year have been disposed of as follows:—

BOYS.

To the Royal Navy	19
To the Army	3
To Situations	7
Returned to their Friends	5
Died	1
	35

GIRLS.

To Situations	38
Returned to their Friends	4

The Girls' School in London was examined by the Rev. SAMUEL EARNSHAW, Chaplain of the Parish Church, Sheffield, on Tuesday, July 28th. The Boys' School at Witley, on Tuesday, August 18th, by E. C. TUFNELL, ESQ., one of Her Majesty's Inspectors, and I transcribe the Reports of those gentlemen, which I hope you will consider eminently satisfactory.

"*Girls' School, July* 28*th*, 1868.

"This day I inspected the Dormitories and other Rooms occupied by the girls, and found everywhere the utmost order, neatness, and cleanliness. In Reading, Writing, Spelling, and the Elementary Rules of Arithmetic, the girls passed a very satisfactory examination, shewing, generally, considerable intelligence in their answers. Their answers on the Catechism were good; the discipline is good, and the School is in a very creditable state, and the Mistress deserves much commendation for diligence and success.

"S. EARNSHAW, M.A."

"*Boys' School, August* 18*th*, 1868.

"Examined the School. At my inspection last year, I had to remark that considerable improvement was manifested in the examination passed by the children, beyond what they had passed in the previous years. I am glad to be able to state that the improvement continues, and that the whole establishment does, in my opinion, much credit to all concerned in its management.

"E. C. TUFNELL,
"*H.M. Inspector of Schools.*"

A very interesting event in the year, was the opening of the New Chapel at Witley for Divine Service, on the 18th of August, in the presence of our late lamented President, Mr. Johnson, the Treasurer, several Aldermen of the City of London, and a large number of Governors. In the unavoidable absence of the Bishop of the Diocese in consequence of severe illness, the Lord Bishop of Oxford, — himself a Governor of the Schools,—most kindly consented to officiate on the occasion. His Lordship was attended by the Archdeacon of Surrey and some of the local clergy, and preached a very eloquent and appropriate sermon. The chapel was filled with a very large congregation, comprising besides the inmates and officers of the School, most of the residents of the neighbourhood. It is now used for daily Morning Prayer; and on Sunday Evenings when the Parish Church is not opened, is generally attended by a considerable number of persons who dwell around us, and who highly value the privilege the Governors have liberally placed within their reach. The chapel is enriched with two stained glass windows, presented to the Governors by our two late Presidents. These windows, which are very tastefully designed, will serve as memorials of our deceased friends, and will testify to future generations the lively interest they felt in its erection.

You will have observed that the larger number of boys discharged in each year continue to enter the Royal Navy. I am happy to report that our boys still maintain the high character in the service, won for the School in former years. The Commanding Officer of the Training Ship at Portsmouth

assures me that they are among the best boys he has; and the large number who attend the meetings of the Committee to receive their rewards, proves that they do not forfeit this character when they have entered upon active service.

On the 17th of January the Choir boys, assisted by some personal friends of my own, performed a selection of vocal music in the presence of a large number of visitors. This little entertainment gave so much satisfaction and pleasure to the audience, that we hope to make it annual. It forms a pleasing variety to the routine of School work; helps to popularize the Institution in the neighbourhood, and has a very beneficial effect upon the boys themselves.

One hundred and thirty-five rewards have been paid by the Committee during the year to former inmates who attended before them with certificates of good conduct.

Twenty-three boys and fifteen girls were rewarded for the first time; 41 boys and 8 girls for the second time, and 39 boys and 9 girls for the third and last time.

The health of the boys has not been so good as I could have wished, and we have lost one by death. The Committee are aware that I have recently directed their attention to this fact, and means whereby the sanitary condition of the School may be improved, are now under consideration; and I shall probably be in a condition to state the result in my next Report.

I am happy to say that the moral conduct of both boys and girls has been as satisfactory as could fairly be expected.

I have only, in conclusion, to express my best thanks to the Governors for their continued confidence, and to assure them that my best efforts will ever be directed to promote the happiness and welfare of the children entrusted to my care, and to maintain the discipline and good order of the whole Establishment.

I remain,

My Lords and Gentlemen,

Your obedient Servant,

EDWARD RUDGE,

Chaplain and Superintendent.

Witley, January 18*th*, 1869.

KING EDWARD'S SCHOOLS,

No. 9.

DAILY OCCUPATION OF THE INMATES.

Hours of Rising.

Six o'clock in the summer months, and not later than 7 o'clock in the winter months.

After private prayer in each dormitory, washing, dressing, &c.

On Week-days.

Until 8 *o'clock.*—The Trades-boys to be employed at their Trades, and the School-boys in making the beds, and sweeping and cleaning the dormitories and other apartments on the male side. The girls selected for employment in the Laundry and Kitchen, and in Household Work, to be engaged in their particular occupations, and the rest in making beds, and sweeping and cleaning the dormitories and other apartments on the female side.

From 8 *to* 9 *o'clock.*—Prayers, breakfast, and recreation.

From 9 *to* 1 *o'clock (except Saturdays)*—Trades-boys at their trades from 9 to 12, and in School from 12 to 1, except three boys employed as bakers, who shall attend School two hours every afternoon.

School-boys in school from 9 to ¼ before 12 o'clock, and in occupation from 12 to 1 under the Arts-masters, as the Superintendent shall direct.

Girls selected for particular employments to be at their respective occupations from 9 to 1 o'clock, as the Matron shall direct; and on alternate days at school during the same hours.

From 1 *to* 2 *o'clock*—Dinner and recreation.

From 2 *to* 6 *o'clock (except Saturdays)*—Trades boys at their trades. School-boys at school from 2 till 5 o'clock, and from 5 till 6 o'clock in occupation, as the Superintendent shall direct.

Girls selected for particular employments to be at their respective occupations, and the rest at needlework, from half-past 2 till 5 o'clock, and in occupation from 5 till 6 o'clock, as the Matron shall direct.

From 6 *to* 7¾ *o'clock*—Supper and recreation.

From 7¾ *to* 8 *o'clock*—Prayer.

8 *o'clock*—Bed-time.

On Saturdays.

No school to be kept, either in the morning or afternoon, and no trades-boys to be required to work at their trades after 12 o'clock. The inmates on this day to be engaged in cleaning the establishment, assorting and distributing clean linen, using the bath, and in such other occupations as the Superintendent and Matron shall respectively direct. The recreation of the inmates to be, when the weather will permit, in the airing grounds, and at other times in the day-rooms, which are to be provided with suitable books for amusement and instruction.

On Sundays.

Until 8 *o'clock*—The inmates to be occupied in *making beds, changing linen, and delivering up all that is dirty*, and preparing for the proper spending of the day.

From 8 *to* 10 *o'clock*—Breakfast, and walking in the airing-grounds, when the weather will permit.

From 10 *to* 11 *o'clock*—In school-rooms, reading the Lessons for the day, repeating Catechism, and answering questions on scriptural subjects.

From 11 *to* 1 *o'clock*—In Chapel for Morning Service and Sermon.

1 *o'clock*—Dinner.

1½ to 3½ *o'clock*—In the day-rooms and airing-courts.

3½ *o'clock*—Afternoon Service in Chapel, and Sermon.

7 *o'clock*—Supper.

8 *o'clock*—Bed-time.

BETHLEM HOSPITAL.

REPORT.

To the Right Worshipful the President, the Worshipful the Treasurer, and the Governors of the Royal Hospital of Bethlem.

My Lords and Gentlemen,

In conformity with the regulations of my office, I beg to lay before you a Report of the Hopital sfor the year 1868, accompanying which I attach the usual Statistical Tables.

During the year 208 patients were admitted, 178 were discharged, and 23 died.

As compared with the year 1867, there was an increase of four in the number of admissions, a decrease of ten in the number of discharges, and a decrease of six in the deaths.

On the 1st of January, 1869, 246 patients remained on the books of the Hospital, classed in the following order:—

	Males.	Females.	Total.
Curables	74	116	190
Incurables	25	30	55
Criminal	0	1	1
	99	147	246

The 208 patients admitted were as follows:

Males.	Females.	Total.
78	130	208

The 178 patients discharged were:—

	Males.	Females.	Total.
Cured	33	67	100
Uncured	32	34	66
For Special Reasons	6	6	12
	71	107	178

Twenty-three patients died during the year:—

	Males.	Females.	Total.
Curables	14	8	22
Incurable	0	1	1
	14	9	23

When it is considered that the greatest possible elasticity of construction is granted to the rules excluding admission; and that where the disease has not existed twelve months, all cases of insanity, including those of general paralysis, are admitted, only excluding those where epilepsy is a form of aggravation, these results must not, I think, be considered unsatisfactory. I cannot refrain from again

calling attention to the condition in which patients are brought to the Hospital; since, in several instances, they have only been sent here when the fatigue of the journey counterbalanced what little prospect of recovery might exist, and, in some cases, when all hope was past. One female patient was in a dying state when brought here, and died before she could be taken into the wards. A male patient, on arrival at the Hospital, was found dead in the cab.

Three inquests have been held during the year:—one on a male patient, who attempted self-destruction before his admission; one on a female patient, who died so shortly after admission, that some inquiry as to the safety and propriety of her removal from home was necessary; and the third on a male patient, who committed suicide by hanging.

We recognize much cause for gratitude, that in an Institution like Bethlem Hospital, where 140 patients who have evinced a suicidal tendency are generally under treatment, it is our duty so rarely to report a suicidal act. At the same time, notwithstanding the greatest care and caution, it is impossible always to conquer a strong suicidal determination.

One of our female attendants died during the autumn. She had for some time been in weak health, though most anxious to perform her duties to the last.

The experiment has been made this year of papering the upper half of the walls of one of the female galleries. The effect gives a great additional appearance of comfort, and will also, it is expected, be found satisfactory, from an economical point of view.

Great inconvenience having been felt from the occasional want of steam power, for the supply of steam to the Hospital, a new boiler has this year, by order of the Governors, been added; and now it is impossible that there should be at any time a deficient supply of the necessary quantity of steam for cooking, heating the wards, or for working and pumping, &c.

A small additional greenhouse has been built by the workmen of the permanent staff, which will enable us to keep a more constant supply of plants ready for the decoration of the various Wards, and the gratification of their numerous inmates.

The workshops for the tailor and shoemaker, mentioned in the last Report, are now completed. It is often difficult to find employment for the male patients, as they are principally received from a class who consider "working at a trade" derogatory to their position. During the last ten years, only 13 tailors and 11 shoemakers have been admitted.

The appointment of a Garden Attendant continues to work well, and the employment finds light occupation for many who would otherwise be idle.

Most of the arguments that have been brought forward in favour of this Hospital being removed into the country do not apply; for had we more land, it would only be a question of employing more paid labourers, since our present kitchen-garden and pleasure-grounds more than suffice to provide ample out-door work and amusement for all who can be induced to assist in keeping them in order.

We have, for the last three years, had two Resident Medical Students elected (every six months) for six months' residence. The system has worked well, and is, I think, the best way of imparting a knowledge of psychological medicine to a limited number of qualified men. The same plan has been adopted at the West Riding Asylum, Wakefield; and Dr. Crichton Browne, in a letter published in the "Association Journal of Psychological Medicine" for January, 1869, gives his experience of such appointments:—

"After eighteen months experience of them, I am strongly impressed with the value of these clinical clerks, and should not now like to be without them. They are of great service, not merely in keeping the Case Books, but in widening and extending that general and unremitting supervision which I believe to be so important in a large establishment like this, and in helping on the medical work in various ways. It is almost impossible for me to describe the vivifying influence which these ardent young men, fresh from the Schools, exert upon the more confirmed medical officers. They rub off the rust of routine, and create a necessity for vigorous reading. They afford too, wonderful facilities for carrying out scientific investigations and careful treatment, while they are themselves undergoing the best preparation for subsequent Asylum appointments, and even for general practice."

It is gratifying to be able to state that all who have been Resident Students at Bethlem Hospital are now either holding Asylum appointments, or are qualified to take important positions in general practice.

We have not entered any non-resident Pupils during the year, and I do not think the fact is a matter for regret. A visit through the wards of an asylum once or twice a week, can be but of very little benefit either to pupil or patient. Until a knowledge of psychological medicine is made compulsory by the Examining Boards for Medical Degrees, and lectures on the subject are delivered at the various Hospitals and Medical Schools, we cannot expect young men voluntarily to come forward and attend a course of instruction that will not be of any service to them in their examinations.

Of the deep loss the Hospital has sustained by the death of the two late Presidents during the year just closed, it is not in my province to refer, more than to desire to place on record in my Annual Report the great regret felt by all the Officers at being separated so suddenly from two gentlemen who, both as Presidents of the Hospitals and personal friends, had always shewn the greatest kindness and consideration towards them in the performance of their several duties.

The occupations and amusements of the patients have continued the same as during former years. About fifty again enjoyed a holiday at Brighton, and excursions have been made to various places in the neighbourhood of the Metropolis.

Mr. George Buckland voluntarily gave a Musical Entertainment to the patients in the summer, which was the source of great pleasure to a large audience, and there have from time to time been meetings for music, singing, and reading.

Two of the Commissioners in Lunacy paid an official visit to the Hospital on July 6th, and left the following Report:—

"*Monday, 6th July*, 1868.

"Since this Hospital was visited on the 26th of April in last year, 282 patients have been admitted—106 males, and 176 females; in the same interim, 248 patients have been discharged—86 males, and 162 females; and the deaths have been 41—25 among the men, and 16 among the women. Of those discharged, 130 had recovered, 11 were relieved, and 107 had not improved. There were two suicides, particulars of which, and of the inquests, were transmitted to Whitehall; and the rest of the deaths were from ordinary causes, the principal being general paralysis and other diseases of the brain, exhaustion after mania and melancholia, and phthisis.

"We have seen to-day, in the several wards and galleries, 243 patients—in the male division 111, and in the female division 132; there being besides, upon the books, 8 males and 9 females at present absent on leave; some for very short periods, others with a view to trial before their discharge. There is now only one criminal patient here; application having been made to the Secretary of State for her retention, on the ground of her age and blindness. The incurable list contains 54 names, and there are 192 classed as curable.

"There was on the whole a remarkable freedom from excitement, even among the least favourable cases, the exceptions being one or two women; and the personal appearance

and condition of the patients generally we thought very good. For the most part all were clothed well; and even where shabbily dressed, as in a few exceptions in the male division, they were well attended to, and not untidy. We were pleased to see everywhere a most liberal provision of amusement and occupation in the wards, of which a considerable proportion of the inmates seemed to be gladly availing themselves; and in every part of both divisions there are evident indications of continued and most praiseworthy effort on the part of all engaged in the management of the Institution to obviate the old and still existing inconveniences of its structure, and make all possible addition to the comfort of the patients. We have made some suggestions to-day as to a certain sort of bed in some of the single sleeping-rooms (all of which, as well as the small associated dormitories, were in excellent order) which Dr. Williams has promised attention to; and referring to the increased cheerfulness introduced lately into some of the galleries, it has given us satisfaction to learn his intention immediately to try the experiment of papering throughout one of the female wards.

"The returns of the employed shew some increase since the last visit, a suggestion then made for engaging a Gardener-Attendant having been acted on, and about 26 male patients were working regularly in the grounds. Altogether, 78 men and 73 women have now daily occupation. Since that visit also the ground formerly given up to the criminal wing has been completely laid out and planted with a view to out-door recreation and games, in which inmates of every class take part; and the usual pleasure excursions, open to more than two-thirds of all the inmates, have been given in

addition. Another visit to the sea-side, such as was provided last year so liberally, will also be made in the present summer; the same houses having been already taken at Brighton, for, as we hope, the same number of 50 patients.

"The seclusion since the last visit has not been considerable; two men have been secluded on three occasions, and twelve women on thirty-two occasions. The health generally is very good; no one was in bed in the male division, and in the female division only four, one for supposed affection of the spine, and one brought here eight days since out of Devonshire, in an entirely exhausted condition. Twenty are entered as taking medicine.

"We have derived from our present visit a very favourable impression of the present state of the Hospital, and of the continued zeal and ability with which Dr. WILLIAMS discharges his important duties.

"Land has been purchased at Witley, near Godalming, for the branch Convalescent Establishment. The house is built for 40 inmates, and is expected to be ready for occupation this summer.

"JOHN FORSTER
"D. J. FORTESCUE
"JAMES WILKES
} COMMISSIONERS IN LUNACY."

My best thanks are due to my Medical colleague, Dr. KEMPTHORNE, and to all the Officers and Servants, for their cordial co-operation in everything suggested for the benefit of the patients.

It is a source of gratification to report that there have been very few changes in the staff of Attendants, and that such changes were caused by resignations. No cases of dismissal for misconduct have occurred during the year.

In conclusion, I beg to tender my best thanks to the Committee and Governors for their continued support and encouragement in the discharge of my duties, and to assure them that all my energies shall be devoted to promote the welfare of this Institution.

I have the honour to be,

My Lords and Gentlemen,

Your very obedient Servant,

W. RHYS WILLIAMS, M.D.

Bethlem Hospital,

January 20th, 1869.

Date of Death. 1868.	Date of last Admission.	Age at Death. Civil State.	Mental State and Bodily Condition on Admission.	Duration and Cause of Disorder.	Assigned Cause of Death.	POST-MORTEM APPEARANCES, And weight of the various Organs in Ounces Avoirdupois.		
						HEAD.	THORAX.	ABDOMEN.
Jan. 6, 6 a.m.	Jan. 10, 1867.	36. Married.	General paralysis; bad health.	Sixteen months. Overwork and religion.	General paralysis.	Arachnoid thickened and opaque; extravasation of lamina of blood at base of brain, which was much shrunken and softened anteriorly, with adherence of pia mater; adhesions along the longitudinal fissure, and the fissure of sylvius; brain 43½, cerebellum 6.	Consolidation of lower lobe of left lung; right lung 31, left lung 38½, heart 8¾.	Organs healthy, right kidney 5, left kidney 5¾, liver 52¼, spleen 4.
March 26.	March 6, 1868.	60. Married.	Melancholia, suicidal, bad health.	Five months. Mental anxiety.	Pyæmia.	Calvarium dense and vascular, dura mater adherent, cysts in choroid plexus; puncta increased, adhesions between lobes; brain shrunk, arteries at base atheromatous; brain 51¾; cerebellum 6.	Heart fatty; mitral valve constructed; aorta atheromatous: middle and lower lobe of right lung hepatized, and lower lobe of left; universal old pleuritic adhesions; right lung 30⅜, left lung 24, heart 13.	Liver myristicated; spleen softened with extreme fibrous thickening of capsule; right kidney normal, left kidney contracted: pelvis blocked up with calculus, structure containing cysts with small uric acid calculi; liver 51½, spleen 4½, right kidney 6¾, left kidney 2½.
April 20, 11 a.m.	March 27, 1867.	45. Single.	General paralysis; bad health.	Thirteen mths. blow on head, and fright.	General paralysis.	Calvarium dense; arachnoid thickened and opalescent; cerebro spinal fluid in excess; pia mater congested, adherent; brain shrunk, 45½; cerebellum, 5¾.	Heart mitral and aortic atheromatous 8; lungs old tubercle and adhesion at left apex, pneumonia of both lower lobes; right lung 23½, left lung 31¾.	Organs normal, liver 44½, pancreas 2, spleen 4, right kidney 4, left kidney 5½.

OBITUARY.—MALES.—1868.

Date of Death. 1868.	Date of last Admission.	Age at Death. Civil State.	Mental State and Bodily Condition on Admission.	Duration and Cause of Disorder.	Assigned Cause of Death.	POST-MORTEM APPEARANCES, And weight of the various Organs in Ounces Avoirdupois.		
						HEAD.	THORAX.	ABDOMEN.
April 26, 9 a.m.	Aug. 30, 1867.	31. Married.	General paralysis; bad health.	Eight months.	Intemperance; sexual excess.	Brain unusually dense and firm, otherwise healthy 49¾, cerebellum 5½.	Organs normal; heart 6¼.	Organs normal, spleen 4½, liver 52½, right kidney 5½, left kidney 5¾.
May 11, 12 a.m.	March 1, 1867.	63. Married.	Mania; bad health.	Sixteen months. Disappointment in business.	Acute tuberculosis.	Calvarium dense on right; dura mater adherent; brain soft; atrophy of grey matter; capillaries dilated; choroid plexus cystoid; convolutions of cerebellum adherent; brain 44½, cerebellum 6¼.	Lungs pleuritic adhesions, infiltrated tubercle in both lungs; heart fatty, tricuspid, valve dilated, atheroma of aorta; heart 8; lungs bronchitis general; right lung 21½, left 15.	Spleen tubercular 10¼, kidneys normal, right kidney 5, left kidney 5, liver fatty 54.
May 6. 1.30 p.m.	Feb. 27, 1866.	76.	Senile dementia; bad health.	Three months. Pecuniary embarrassment.	Senile decay.	Dura mater congested and adherent; lamina of blood in arachnoid; dilation of capillaries of brain, arteries of base very atheromatous: convolutions shrunk; choroid plexus cystoid; brain 51½; cerebellum 6¼.	Heart fatty, mitral valve dilated, aortic valve atheromatous, calcareous plates in the aorta; heart 8.	Mesenteric glands tubercular, intestines the seat of tubercular ulcers; liver 49½, spleen 6, kidneys atrophied, right kidney 4½, left kidney 4½,

OBITUARY.—MALES.—1868.

Date of Death 1868.	Date of last Admission.	Age at Death. Civil State.	Mental State and Bodily Condition on Admission.	Duration and Cause of Disorder.	Assigned Cause of Death.	POST-MORTEM APPEARANCES, And weight of the various Organs in Ounces Avoirdupois.		
						HEAD.	THORAX.	ABDOMEN.
May 31, 2 a.m.	Oct. 7, 1867.	31. Married.	Mania with Epilepsy	Eight months.	Organic disease of the brain, with paralysis.	Dura mater adherent, pia mater adherent at fissures of sylvius, veins congested; puncta very numerous; ventricles studded with opalescent protuberances; brain 51½, cerebellum 7¼.	Lungs—right lung 36½, left lung 19½, lower lobe of right lung hepatized, heart 19, fatty, both ventricles hypertrophied.	Liver 64, great hepatic congestion, right kidney 6¼, left kidney 5¾, spleen 5¾.
June 14, 12.40 p.m.	Feb. 8. 1868.	40. Married.	Mania; bad health.	Seven months. Mental anxiety.	Aneurism of aorta.	Brain 42½, cerebellum 5½; calvarium injected, dura mater adherent.	Left lung emphysematous, apex of right lung tubercular; heart great atheroma of mitral valve, arch of aorta dilated, aneurism of aorta eroding 10th, 11th and 12th dorsal vertebræ, which had burst into the left pleura, clot extravated weighing 5¼ lbs. Heart 11½, right lung 21, left lung 9½.	Organs normal, right kidney 4¾, left kidney 4, liver 49½, spleen 5.
June 18, 11 p.m.	June 21, 1867.	38. Married.	General paralysis.	One year. Fast life.	General paralysis.	Calvarium dense and unsymmetrical, pia mater non-adherent, convolutions shrunken, brain substance softened, puncta increased in number, cerebro spinal fluid in excess; brain 42, cerebellum 5½.

						HEAD.	THORAX.	ABDOMEN.
Jan. 17, 1868. 4 a.m.	Dec. 24. 1867.	36,	Acute mania; bad health.	Six weeks; intemperance; amenorrhœa.	Cerebral hœmorrhage.	Arachnoid opalescent and thickened; pia mater injected; adhesions along the longitudinal fissures and fissures of sylorics puncta very numerous; grey matter dark; white matter pink; central ganglia pink, with very numerous puncta; pons and medulla congested in small extravasations of blood; brain 48½, cerebellum 5½.	Right lung 16¼, left lung 13½.	Organs normal; liver fibroid, thickening of capsule, 47¾, spleen 2¾, right kidney 4¼, left kidney 4¼.
Feb. 10, 1868. 2 a.m.	July 29, 1867.	18, Single.	Mania, with hysteria; bad health.	Seven months; menorrhagia.	Tubercular meningitis.	Calvarium very thin; dura mater adherent; pia mater injected; arachnoid opaque, of a greenish opalescent tint; base of brain anteriorly was occupied by a semi-solid greenish lymph, involving the optic thalami, the pituitary body, the roots of the olfactory nerves, the optic tract, the third nerve, and the crura cerebri; weight of brain 44¾, cerebellum 5¾.	Lungs: universal tubercle, bronchial glands; pleura and diaphragm also tubercular; heart normal, 7½: right lung 15¾ left lung 14.	Kidneys, liver, spleen and peritoneum tubercular; pancreas, stomach and intestines normal; Fallopian tubes much dilated and filled with viscid mucus; liver 48¾, right kidney 4½, left kidney 4¼, spleen 7¾.

OBITUARY.—FEMALES.—1868.

Date of Death, 1868.	Date of last Admission.	Age at Death. Civil State.	Mental State and Bodily Condition on Admission.	Duration and Cause of Disorder.	Assigned Cause of Death.	POST-MORTEM APPEARANCES, And weight of various Organs in Ounces Avoirdupois.		
						HEAD.	THORAX.	ABDOMEN.
March 9, 1868. 2 p.m.	Nov. 17, 1864.	40, Married.	Mania; bodily health bad.	Three & a-half-years; menorrhagia.	Atrophy of brain and paralysis; pelvic abscess.	Calvarium dense and vascular; dura mater adherent; excess of cerebro-spinal fluid; convolutions of brain much atrophied, giving surface of brain an irregular appearance; arachnoid thickened and gelatiniform.	Lungs: apices tubercular; heart normal.	Liver: Left lobe flattened out as large as right, adherent to spleen; spleen normal, kidneys mottled and fatty; uterus pushed against the rectum; and cœcum and colon drawn down and matted together with the ileum in the recto-uterine pouch.
May 21, 1868. 10 p.m	Feb. 29, 1868.	40, Married.	Religious mania bad health.	Seven months; religion, and phthisis.	Phthisis.	Calvarium anœmic; dura mater adherent; brain soft; diffluent around ventricles, and forming grey matter pinkish; capillaries dilated; brain 46¾, cerebellum 6.	Lungs; left, apparently a mass of fibrous tissue, with cartilaginous dissepments, by which it was hollowed into cavities crossed by impervious vessels; right lung tuberculous and hypertrophied; right lung 19, left lung 11; heart small, drawn two inches to left by pleuritic adhesions; heart 5¼.	Organs normal; liver 25¼, spleen 5¼, right kidney 3¼, left kidney 3¼.
July 23, 11.30 a.m.	July 17, 1868.	43, Married.	Puerperal mania; extreme exhaustion.	Four months; parturition.	Disease of kidneys.	Dura mater adherent; pia mater injected; brain shrunken and dense; cerebro-spinal fluid in excess; brain 45½, cerebellum 5½.	Lungs universally adherent; heart 8¾.	Kidneys small and contracted; left kidney 3¼, right kidney 4.

OBITUARY.—FEMALE.—1868.

Date of Death. 1868.	Date of last Admission.	Age at Death. Civil State.	Mental State and Bodily Condition on Admission.	Duration and Cause of Disorder.	Assigned Cause of Death.	POST-MORTEM APPEARANCES, And weight of various Organs in Ounces Avoirdupois.		
						HEAD.	THORAX.	ABDOMEN.
Oct. 6, 10 a.m.	Sept. 26.	42, Single.	General paralysis; bad health.	Unknown; intemperance.	General paralysis.	Atrophy of brain.	——	Contracted liver and kidneys.
Nov. 6, 10.30 a.m.	May 6, 1868.	52, Married.	General paralysis; bad health.	Unknown.	General paralysis; pyœmia.	Arachnoid thickened gelatiniform; convolutions in places much atrophied; pia mater injected, brain shrunk, puncta very numerous; excess of cerebro-spinal fluid; ice-plant granulations on walls of ventricles; ossific plates in dura mater: brain 46½, cerebellum 6¾.	Right lung, lower lobe, pneumonia; left lung, pleurisy between upper and lower lobes, which formed a cavity filled with recent pus, and whole lung was filled with small centres of suppuration; no tubercle; heart 11½, right lung 38½, left lung 37.	Liver fatty, 53, kidneys contracted and granular, spleen rotten, 6.
Dec. 17.	Aug. 2, 1863.	63, Married.	Mania; good health.	Six years hereditary.	Atrophy of brain.	Calvarium thickened; dura mater adherent; cerebrum much shrunk, especially over anterior lobes, where arachnoid is much thickened, and opalescent cerebro-spinal fluid in excess; brain 28½,	Lungs much atrophied; right lung 8¾, left lung 11¾; heart small, flabby, with great deposit of fat, and fatty degeneration; heart 9.	Liver contracted; myristicated 34, spleen 4, kidneys contracted; right kidney 2¼, left kidney 2¼; enormous quantities of ædipose tissue in abdomen.

DIETARY TABLE.

Breakfast.

Every Day..	Males ..	Tea, with 7 oz. of Bread and Butter.
	Females..	,, 6 ditto

Dinner.

Sunday	Males	6 oz. Boiled Beef free from bone	4 oz. Bread,	¾	lb. Vegetables,	1	pt. Beer.
	Females..	5 ,, ,,	4 ,,	½	,,	½	,,
